

ARTIFICIAL INTELLIGENCE
By John Binks

ROBOTICS AND artificial intelligence

Robotics equipped with AI can collaborate with humans in various settings such as manufacturing, healthcare, and service industries, enhancing productivity and safety.

What is robotics?

Robotics is a branch of technology that deals with physical robots. Robots are programmable machines that are usually able to carry out a series of actions autonomously, or semi-autonomously.

Artificial intelligence?

Artificial intelligence (AI) is a branch of computer science. It involves developing computer programs to complete tasks that would otherwise require human intelligence.

Don't blame
me. It's a droid
protocol!
