

# HEY, SIRI... Who's Alexa?

Artificial intelligence (AI) is concerned with building smart machines capable of performing tasks that typically require human intelligence.

## Siri, by Apple

Is a virtual assistant AI technology that is part of Apple Inc.'s iOS, iPadOS, watchOS, macOS, and tvOS operating systems. The assistant uses voice queries, gesture-based control, focus-tracking and a natural-language user interface to answer questions, make recommendations.

Reviews

## Amazon, Alexa

Amazon Alexa, also known simply as Alexa, is a virtual assistant AI technology developed by Amazon, first used in the Amazon Echo smart speakers developed by Amazon Lab126. It is capable of voice interaction, music playback, making to-do lists, and more.

Reviews

## Google Assistant

It has made incredible progress since its 2016 launch and is probably the most advanced and dynamic of the AI technology assistants out there. Google has spread Assistant far and wide, not only on its own hardware, but through partnerships.
